Professional Profile

DevOps & Cloud AWS Engineer with over 5 years of experience in infrastructure automation, CI/CD, and cloud security. Specialized in setting up CI/CD pipelines, Infrastructure as Code (Terraform, Ansible), and DevSecOps. Proven expertise in cloud cost optimization, AWS environment security, and system performance enhancement. Passionate about innovation, Python/Bash development, and scalable solutions.

Technical Skills

- **Cloud & Automation:** AWS (EC2, RDS, S3, EKS, IAM, Step Functions, Glue, SNS, SQS, Lambda, Transit Gateway, Athena, Route 53, ACM, Load Balancer, CloudFront, CloudFormation, SSM, API Gateway, AWS Config Rule, API Gateway, Generative IA...).
- DevOps & CI/CD: Kubernetes, Docker, Jenkins, GitLab CI/CD, SonarCloud, Trivy, Terraform, Ansible, SaltStack, Jira, Confluence.
- **Cloud Security:** AWS IAM, GuardDuty, WAF, Security Groups, NACL.
- **Scripting & Development:** Python, Bash, JavaScript, C#, Node.js.
- **Monitoring & Observability:** Prometheus, Grafana, Datadog, CloudWatch.
- **Systems & Networking:** Linux, Windows Server, Active Directory, Fortinet, VPNs.

Professional Experience

Canal Plus, Paris, France

DevOps Engineer | AWS Cloud | CI/CD | Infrastructure (January 2024 – Present)

- Key contact between Dev and Ops teams, facilitating collaboration and incident resolution.
- Managed CI/CD pipelines (Jenkins, GitLab) and automated deployments with Terraform and SaltStack.
- Performance analysis and monitoring using DataDog and Elasticsearch.
- Secured and scaled AWS infrastructure by implementing best DevSecOps practices.
- Automated tasks using Python, Groovy, and Bash.
- **Project MediaHub:** Contribution to platform automation, migration, and monitoring of video transcoding and storage processes.

Schneider Electric, Paris, France

DevOps & Security Engineer | Cloud AWS | CI/CD | Infrastructure as Code (June 2023 – December 2023)

- Integrated security controls early in the development phase.
- Automated CI/CD pipelines with security testing (SonarCloud, Trivy).
- Deployed scalable infrastructure using Terraform and Ansible.
- Conducted security training and awareness for development teams.
- **Project EnergySage:** Setup, deployment, security enhancement, and automation of the EnergySage platform on AWS cloud infrastructure.

Dalkia Aegis, EDF Group, Paris, France

DevOps & Cloud Engineer | AWS | Infrastructure & Security | FinOps (January 2022 – May 2023)

- Designed and optimized environments (Non-Prod, Pilot, Prod) for scalability and resilience.
- Strengthened infrastructure security and implemented best DevSecOps practices.
- Optimized AWS costs with FinOps strategies and financial tracking tools.
- Automated deployments using CloudFormation, Terraform, and PowerShell.
- Implemented global monitoring solutions (Prometheus, Grafana, Loki, Alertmanager).
- **Project BIM Connect:** Setup, deployment, security hardening, monitoring, and automation of the infrastructure for the BIM Connect application.

Renault, Paris, France

DevOps Engineer (June 2019 – December 2021)

- Automated repetitive tasks using Python, reducing execution time.
- Deployed and maintained development, test, and production environments.
- Implemented advanced monitoring solutions (Prometheus, Grafana, Datadog).
- **Project Lecteur Exécuteur**: Fully automated testing frameworks, reducing manual interventions.

Bouygues, Paris, France

Network and Systems Administrator (September 2018 – April 2019)

- Automated network configurations with Python, improving efficiency.
- Managed and monitored systems using Nagios.
- Secured infrastructures by managing firewalls and VPNs.

Education

University of Nice, France – Degree in Telecommunications Systems (2018)

POEC .NET, ENI School, France – Training in .NET Development (2023)

Certifications

- AWS Certified Solutions Architect - Associate
- AWS Certified DevOps Professional (Expected Q1 2025)
- CCNA - Cisco Certified Network Associate (Expired in July 2024)
